Colour Mobile VMS

Colour **Mobile VMS**

5 Colour LED Display

Our products use the latest in LED technology to help you communicate with clarity and authority.

Our new VMS range is still capable of generating industry standard, amber messages but now have the added benefit of colour messages and images using our specially designed Colour LED Panels ®.

Why 5 Colour?

Studies have shown that motorists respond pro-actively to colour signs. Combining colour with elements of an LED Full Matrix display makes the new Bartco colour VMS the choice when it comes to Traffic Management.
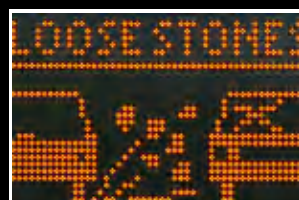

Traffic Management

Pedestrian Crossing

Commercial Events

Motorist Warnings

Full **Colour Advertising**

All Colour VMS are solar powered and use the latest in LED technology to generate text, graphics and animation ideal for a range of outdoor or indoor events.

Specifications

Portable Colour VMS - A Size (VM-A-5C-BSM)

1610mm x 1040mm

Designed for inner city and urban works (or for roads with speed zones up to 37mph. Versatile, easy to setup and operate and reliable under all conditions.

### Portable Colour VMS - B Size (VM-B-5C-BSM)

2360mm x 1440mm

For speed zones up to 50mph, the Bartco Colour VMS B Size is compact and easy to manoeuvre, incorporating all functions and features of our range of Colour Variable Message Signs Boards.

Portable Colour VMS - C Size (VM-C-5C-BSM)

2730mm x 1850mm

Bartco Colour VMS C Size is our most popular portable Variable Message Sign Board. Thanks to its large high visibility display, user friendly interface and reliability is largely used on roads where speeds are greater than 62mph.

Fold-Up VMS

With the ability to be taken and operated virtually anywhere

The Fold-up VMS is perfect for short term roadwork signs, emergency services, shop front advertising or event promotion.

Road Work Signs

School Crossings

Used with Radar to display traffic speed
